Always try to use that time for yourself. We spend all this time building ourselves and building our businesses and companies, but when our work day is finished no one else really knows (or wants to know) what you were doing, when you had your lunch, or what you did with your time. What really matters in our business is the information we share, and the insight we share, people care about that. They only care that you are taking time off, they don't care about what you actually do during that time. They want to know that you are taking a break, and they want to know what you are doing now. That's the important information. Technology drives the world now, it's where we spend a lot of our time, like most of our waking time. But in reality, social media is just a band-aid. In reality, we spend most of our time doing very little that we actually see, and we spend much of our time doing things that we don't intend to really accomplish.

A lot of the features are the same between Adobe Photoshop and Photoshop Elements, and most of them can be accessed by simply opening the program. The main difference between the two is that Photoshop has additional features. If you don't know what you want to do, then Photoshop Elements might be easier to use. This can be slightly overwhelming because there are a few different Creative Cloud plans to pick from according to what your area of interest is. To make things simple there are 3 different options that you will have to choose from that include Photoshop. First the 'Photography' plan which is \$9.99/mo and grants you access to Adobe Photoshop and also Adobe Lightroom which is a program that allows for detailed photo editing. This is a great value considering the second option is \$20.99/mo for use of only Photoshop. The third and final option which I think is the best option is the Student and Teacher plan that is \$19.99/mo and includes access to every Adobe program available. This is an amazing value because you get access to everything Adobe has to offer. From there you can learn and try new programs that Adobe offers to see what your favorite is. If you would like to save 60% on an Adobe Creative Cloud plan then you can click the link here to sign up. For those of you who haven't transitioned to Adobe Creative Cloud yet, we're offering free trial of all three Adobe Creative Cloud plans. The trial offers you 30 days to try all three plans to see what works best for you. Go to <https://creative.adobe.com/products/photoshop-lightroom> to get started.

The museum photography department took the Getty representatives another step further by collecting over one million historic Getty Museum images for Sage (their machine learning platform). The Getty's goal was to ensure that machine learning would be properly trained on images with the correct resolution and color depth, and the Getty Museum also made available images of historic artworks. Adobe is now sourcing artworks from the Getty Museum to ensure that the machine vision technology captures all the nuance of the artwork, which is incredibly important when building AI models. The Getty is also working on image libraries for popular scenarios like holiday parties and portrait sessions, as well as crowd sourced portraits, which is an exciting area for us as it will help collect a range of images for the millions of

photos we expect to be taken this holiday season. Lastly, the Getty is contributing to the diversity of those images as well by maintaining a workable and diverse collection of images.

February 2, 2014: It's an exclusive package that the Flaming Lips provided on their website. The gift hall contains two signings, one at noon and the other at 6 p.m. I couldn't miss it, and I can't wait to meet them. I'm not sure if he's already read the book, but if he hasn't, I'll be glad to give him a copy to read along, he can do it first as long as he read the real book. Quickly, you can read the writing editing and grammar online by going to the website: <http://websly.com> at the end of this post. They are having a competition in which you can win a limited edition t-shirt. Today I want to show you some of my Nick Griffin's footage. I've met him in person last year and we've already talked about having a partnership. He's already assigned me a job, which is a collaboration, so he already trust me more than many people. It's nice to work with someone like Nick. He has a lot of surprises, he has his own unique style and style of storytelling. It's not all strictly like photojournalists, it can be a cool harmonious use of different media. The Olympic of 3D is a 3D text generator that has a 12,856,320 3D text objects that can create simple & complex 3D objects with geometric objects that can be manipulated. This site includes 11 new 3D text application. In the new release of 3D text, the geometric characters are fully editable and you can drag this into new shapes in the 3D model with no need to create 3D objects first. And if the shapes don't fit what you want you can switch between the "extrude" and "flat shading" modes. I personally like this feature and it enables otherwise complex 3D objects to create more intuitive designs.
