Reminders can keep you on track. When a project is running late, you can serve up a reminder message. When you have a project assigned to you, you can create a reminder and send it to the project owner and let them know the deadline has passed. Another handy new feature, is the inclusion of the View Transform panel. It allows you to apply adjustments or start a resizing and cropping effect, without having to go into the Adjustments or Adjustment Layers panel settings. This must be opened by clicking on a height or width grid on a layer. The Universal Layers feature allows you to have the same layer on multiple images in a single project. New this time is the Touch Map function. You can move around the image on the Touch Map, a bit like you would do on a mobile app, to adjust layers, effects, and more. This can also help make multilayer adjustments to a photo. Access to the rotogravure and platinum effects that used to be part of the Raster Effects plugin is now available as part of the Photoshop Mixer, or you can go back to the Photoshop Layers panel and open the Effects panel as well. You can use the Scale and Stroke Mixer panel on the iPad Pro as a working stage while you work on the image in the preview window. When you expand a layer in the Layers panel, you can see previews. You can also drag a single image from the library into the panel and have it serve as the base layer, making it easy for you to work on multiple images. A new Enhance Slideshow feature simply allows you to play back the

slideshow of an image sorted by the date it was added to your library. If you're familiar with the Slideshow feature in Lightroom, you will find that it works the same for the iPad, only it's the iPad's camera taking the shots.

"There are a huge number of creative professionals who create and share content across their own devices," said Edward Snowden, senior vice president of Adobe Services. "They want to have a tool that works seamlessly to empower creative dialogue wherever they are, fully able to work, go back to their files, and seamlessly share what they're working on." "Photoshop democratized creative tools, allowing anyone to build the artifacts of their imagination. The depth and breadth of its feature set is unparalleled," said Ciena dePays, CTO at Adobe. "The new collaboration enhancements, powered by Denali, make it easy for anyone, anywhere to work together across time-honored and innovative creative processes. Together, the new collaboration capabilities will redefine workflow, and increase productivity -- no matter where and how you create." "Adobe introduced Share for Review to enable anyone to instantly annotate content wherever they are -- whether at an event, web conference, or their own desk -- and bring their ideas into Photoshop. They're also making it easier than ever before to annotate and share on mobile devices," said Brandon Petit, senior

director, Adobe Labs. “While the initial feedback was overwhelmingly positive, we knew there were even more capabilities that we needed to add.” The new Share for Review feature includes more than 70 Photoshop-enabled actions to complete tasks with ease. These actions include the ability to quickly annotate, crop, edit, format, or create effects or assets for a website or a web market. Camera roll improvements in the latest Creative Cloud desktop app also allow users to quickly annotate photos on the spot.
